

We believe in the value of carefully selected and slower shopping.  
Therefore we offer a selection of items which are not related to fast rushing  
trends and time.

Design that looks at longer cycles of human behavior and sustainability.

We don't aim to create and promote just the products , but we would like to  
introduce also the people and process behind every single piece. With every  
design, you'll have a glimpse into the tradition of the craftsman and into the  
entire production chain.

Every design is one of a kind as consequence for the unique work of  
craftspeople.

Sometimes it is necessary to use more time in order to do things in a beautiful  
way.
